PROFILE

Software Engineering student pursuing an HND at ESOFT Metro Campus and currently progressing to a Top-up BSc degree at Kingston University. Hands-on experience building a full-stack web and mobile application as a final-year project, covering front-end, back-end, database design and secure authentication. Seeking a Software Engineering Internship to apply and grow full-stack development skills in a professional environment.

TECHNICAL SKILLS

- Languages: Java, Python, C#, PHP
- Web: HTML5, CSS3, JavaScript, React.js
- Mobile: React Native
- Backend: Node.js / Express, Python (Django)
- Databases: MySQL, MongoDB
- Cloud & Security: Firebase / AWS, JWT authentication, AES encryption
- Tools: Git, VS Code, NetBeans

KEY PROJECT — FINAL YEAR PROJECT

Lost & Found Item Management System (Web & Mobile App)
Designed and building a secure web and mobile platform that lets users register, create profiles, and log personal belongings (documents, wallets, vehicles, valuables) with photos.

- Built user registration, authentication and profile management with encrypted, JWT-secured data access.
- Implemented an intelligent search and filter system to locate items by type, category, or identifier.
- Developed an ownership-verification feature that links a found item to the uploading user's profile, enabling direct owner–finder contact.
- Tech stack: React.js and React Native front ends, Node.js/Express backend, MongoDB/MySQL database, Firebase/AWS hosting, AES encryption for sensitive data.
- Following Agile (Scrum) methodology across requirements analysis, design, implementation and testing phases.
